Energy Policy

CP Aextra Public Company Limited, a leading retail and wholesale operator of consumer goods, regards energy management as an integral part of its business operations. The company places high importance on energy conservation, natural resource sustainability, and environmental preservation. Executives at all levels and employees are required to actively support and take direct responsibility for efficient energy use to ensure continuous sustainability and collaboration across all sectors. To this end, the company declares its energy policy as follows:

1. The company will establish objectives, targets, and action plans for energy conservation, with regular reviews of their effectiveness every year.
2. The company is committed to sustainable energy conservation activities, ensuring a balanced and appropriate use of natural resources and the environment, in alignment with the growth of the business and the organization.
3. The company will comply with all laws and regulations related to energy use, energy consumption levels, and energy efficiency.
4. The company is dedicated to promoting energy conservation activities by emphasizing the importance of involving relevant personnel and fostering awareness of energy conservation across all sectors.
5. The company will support the design, procurement, and acquisition of machinery, tools, equipment, and other services necessary to enhance energy performance.
6. The company will continuously improve energy performance with the goal of increasing energy efficiency and appropriately applying it to various activities to achieve maximum organizational effectiveness.
7. The company will provide adequate resources and information to achieve energy objectives and targets while maintaining the energy management system.
